#### INSTRUCTIONS FOR USE

First clean the area to be treated with a vacuum. Shake the can well before use. Tilt the can upside down, then spray evenly and sparingly 40 cm from the surface to be treated. Spread out in a thin, even layer and rub the stains with a brush or broom to properly soak the fibers.

Leave to work for about ten minutes. When drying, the foam treats deep fibers.

Brush again with a dry and clean cloth. The foam has literally absorbed the dirt which is now soaked in the cloth.

After fully dry, vacuum or brush carefully.
